CONTENTS

Contents	V
Executive Summary	1
Introduction	14
Chapter 1	
Global economic inequality: insights	18
What is the level of global economic inequality today?	20
Global income and wealth inequality between individuals: initial insights	20
Global income and wealth inequality between countries	22
Income inequality varies significantly across regions.....	24
Differences in inequality are not well explained by geographic or average income differences	27
The geographical repartition of global incomes.....	27
The limited impact of redistribution on global inequality	28
The complementarity between predistribution and redistribution	31
The extreme concentration of capital	32
Box 1.1 Income and wealth inequality concepts used in this report	38
Box 1.2 The WID.world and Distributional National Accounts Project	38
Box 1.3 The rich ecosystem of global inequality data sets.....	40
Box 1.4 Impact of the Covid crisis on inequality between countries	42
Box 1.5 Impact of the Covid shock on inequality within countries.....	42
Box 1.6 What is the relationship between Gross Domestic Product, National Income and National Wealth?	46
Box 1.7 Comparing incomes, assets and purchasing power across the globe	47
Chapter 2	
Global inequality from 1820 to now: the persistence and mutation of extreme inequality	50
Global inequality rose between 1820 and 1910, and stabilized at a high level since then.....	53
Within-country and Between-country inequalities are as great in 2020 as in 1910	55
The global economic elite never fully recovered its <i>Belle Époque</i> opulence	57
The regional decomposition of global inequality: back to 1820?	60
Taxes and transfers do not reduce global inequality that much	65
Understanding the roots of global economic inequality: center and periphery imbalances	65

Global inequality within countries is higher than inequality between countries – which remains significant	69
Box 2.1 Global inequality: beyond income measures	71

Chapter 3

Rich countries, poor governments	74
What is wealth and what does owning capital mean?.....	76
Global private and public wealth: insights.....	78
The return of private wealth in rich countries	79
The secular fall of public wealth was exacerbated by the Covid-19 crisis.....	79
The rise of private wealth in emerging countries	81
The decline of public wealth across the world	82
Net foreign wealth has largely increased in East Asia and fallen in North America	84
Financialization increased everywhere since 1980, but at different speeds	85
Economies are increasingly owned by foreigners but some have resisted this trend more than others.....	86
Box 3.1 How do we measure wealth inequality within countries?.....	88

Chapter 4

Global wealth inequality: the rise of multimillionaires	90
Global wealth data remain opaque	92
How large is global wealth and where is it held?	93
The uneven increase in wealth since the 1990s	95
Extreme growth at the very top	96
The evolution of wealth inequality in rich countries	97
Wealth inequality in emerging countries	100
What is driving global wealth inequality?.....	101
Box 4.1 Who owns what? Breaking down asset ownership by wealth group	103
Box 4.2 How do we measure wealth inequality?	103

Chapter 5

Half the sky? The female labor income share from a global perspective	106
Female labor income share across the world today: regional divides	109
Evolution of women's income share across the world.....	110
Women earn just a third of labor income across the globe	111
The role of pay ratios vs. employment ratios.....	112
Breaking the glass ceiling: women at the top of the wage distribution	114
Box 5.1 Methodology.....	116
Box 5.2 Gender inequality metrics	117

Chapter 6

Global carbon inequality	122
The need for better monitoring of global ecological inequalities.....	124
Global carbon inequality: initial insights.....	125
Emissions embedded in goods and services increase carbon inequalities between regions.....	129

Global carbon emissions inequality.....	133
Per capita emissions have risen substantially among the global top 1%.....	133
Inequalities within countries now represent the bulk of global emissions inequality.....	136
Addressing the climate challenge in unequal societies.....	137
Box 6.1 Measuring carbon inequality between individuals.....	145
Box 6.2 Carbon footprints of the very wealthy	146
Chapter 7	
The road to redistributing wealth	148
Why tax wealth?.....	150
Modernizing personal wealth taxation	151
Estimates for a global progressive wealth tax.....	152
Regional wealth tax estimates	153
Factoring-in behavioral responses to wealth taxation	154
Box 7.1 Learning from past and current examples of progressive wealth taxation	159
Chapter 8	
Taxing multinationals or taxing wealthy individuals?	160
The role of corporate tax in the progressivity of the tax system	162
The decline in corporate taxation since the 1980s	164
The promises and pitfalls of minimum taxation.....	165
Chapter 9	
Global vs unilateral perspectives on tax justice	170
Usefulness of unilateral approaches: the case of FATCA.....	172
Estimates of unilateral vs. multilateral tax deficit collection ..	173
Anti-tax evasion schemes contain many loopholes and cannot be assessed.....	175
Properly assessing the road towards tax transparency: publishing basic information	176
Towards a global asset register	177
Box 9.1 Central Security Depositories as building blocks for a global financial register	179
Chapter 10	
Emancipation, redistribution and sustainability	182
The rise of the Welfare State in rich countries (1910-1980)	184
The limited rise of tax revenue and public spending in emerging countries since 1980	186
The stagnation of global tax revenue and social expenditure (1980-2020).....	187
Lessons from failed trickle-down economics	187
The 1980-2020s have been marked by a rise of tax evasion, further undermining tax progressivity.....	190
Using 21 st -century progressive tax revenue to invest in education, healthcare and the environment.....	191
Global redistribution: moving beyond development aid	192
Ending center-periphery imbalances.....	193

CONTENTS

Box 10.1 One-off wealth taxes: a window of opportunity?.....	192
Box 10.2 Unequal access to healthcare: how the Covid crisis revealed and exacerbated healthcare inequalities between countries	195
