International communication encompasses everything from one-to-one cross-cultural interactions to the global reach of a broad range of information and communications technologies and processes. Routledge Studies in Global Information, Politics and Society celebrates – and embraces – this depth and breadth. To completely understand communication, it must be studied in concert with many factors, since, most often, it is the foundational principle on which other subjects rest. This series provides a publishing space for scholarship in the expansive, yet intersecting, categories of communication and information processes and other disciplines.

1. Framing War
   Public Opinion and Decision-Making in Comparative Perspective
   Francesco Olmastoni

2. Political Communication and Leadership
   Mimetisation, Hugo Chávez and the Construction of Power and Identity
   Elena Block

3. The Power of Information Networks
   New Directions for Agenda Setting
   Edited by Lei Guo and Maxwell McCombs

4. Television News and Human Rights in the US & UK
   The Violations Will Not Be Televised
   Shawna M. Brandle
